StareVerse

SAMPLE

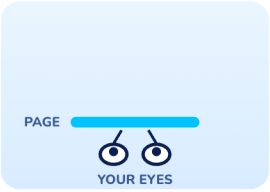
Stereogram Collection

A look inside every book.

How to see it

No glasses needed. Just relaxed eyes and a little patience.

1 Hold it close

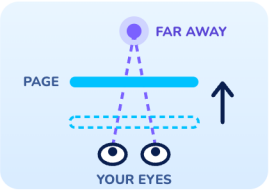


Page almost touching your nose.

2 Look through it

Stare at something far behind the page.

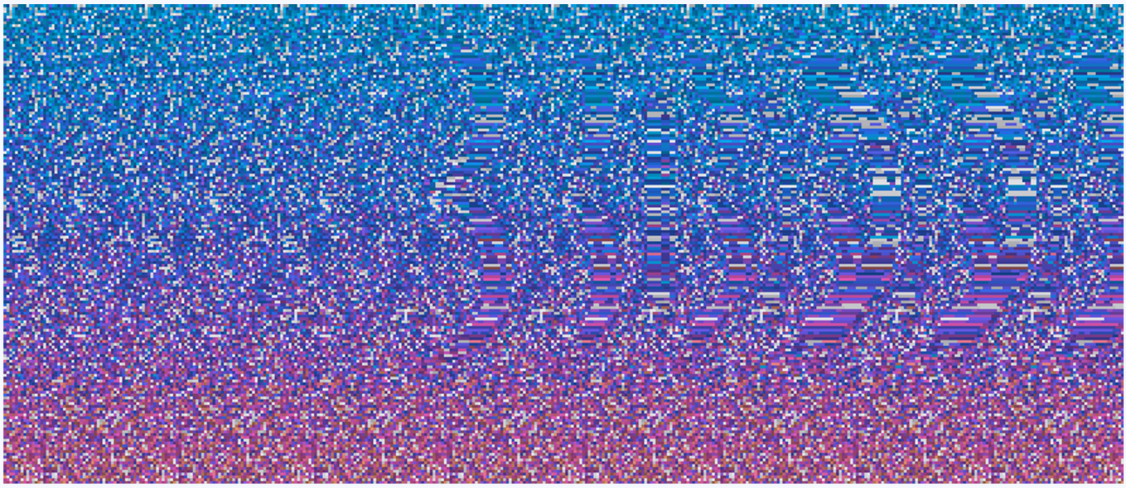
3 Move it away



Wait. The picture pops out.

WARM-UP

Look through the page until the two dots become three. Then wait for the hidden picture to pop out.



TIPS

Light. Use good, even light and avoid glare on the page.

Relax. Blink often and keep your eyes soft, not tense.

Break. Rest your eyes if they feel tired or sore.

Can't see it yet? Take a break and try again. Some people may not be able to see stereograms, and that is okay.

The books are listed on the next page.

The books

The miscellaneous pictures are mixed. What changes per volume is the pattern around them.

1. **Alphabet Edition**
   26 English letters, A to Z.
